

Common Misconceptions Often Heard:

“I never go online, I don’t need virus protection.”

“I never open E-Mail from someone I don’t know, so I will never get a virus.”

“I never open attachments... I am not going to have a virus.”

“My virus software is up to date... it does it itself.”

“I only browse the web... I don’t need virus software.”

“My virus software hasn’t found any viruses.”

“Why is my virus software disabled? ...because it slows down my machine.”

“Firewall? Sure, I have one.... What is that anyway?”

“Yeah, I have a firewall... It’s working...”
